 Petro1Oil

REDOMATTM

P1 – GBA CVT

Produced by Petro 1 special base oil and hi-tech additives.

Description & Applications:

REDOMAT P1 – GBA CVT is high performance, continuously variable transmission fluid designed to meet the service fill use for many Japanese designed vehicles. REDOMAT P1 – GBA CVT provides smoother, consistent all weather step-less shifting, and all-around lubrication protection of the transmission components to help extend transmission service life and provide a smooth driving experience.

Minimum Performance Levels :

Audi and VW (TL 52180; G 052 180), Ford (CVT30/Mercon C), Subaru (Lineartronic CVTF), Honda (HMMF), Nissan (NS-2), Mitsubishi (CVTF-J1/SP-III), BMW Mini Cooper (EZL 799), Hyundai and Kia (SP-CVT 1), Suzuki (TC/NS-2/CVT Green1), Dodge, Jeep (NS-2/CVTF+4), GM Saturn (DEX-CVT), Ford (CVT23), Mercedes Benz (236.20).

GIRBOX™

75W80 P1 - GBM 02

Description & Applications:

GIRBOX - 75W80 P1 – GBM 02 is a premium gear oil formulated by an exclusive blend of high-viscosity, shear-stable base oils and an extra treatment of high-performance additives. P1 Category GB02 designates the type of service characteristic of gears, particularly hypoids in automotive axles under high-speed and/or low-speed, high-torque conditions. Lubricants qualified under U.S. Military specification MIL-L-2105D (formerly MIL-L-2015C), MIL-PRF-2105E and SAE J2360 satisfy the requirements of the P1 – GBM 02 service designation.

75W90 P1 - GBM 02

Description & Applications:

GIRBOX - 75W90 P1 – GBM 02 is a premium gear oil formulated by an exclusive blend of high-viscosity, shear-stable base oils and an extra treatment of high-performance additives. P1 Category GB02 designates the type of service characteristic of gears, particularly hypoids in automotive axles under high-speed and/or low-speed, high-torque conditions. Lubricants qualified under U.S. Military specification MIL-L-2105D (formerly MIL-L-2015C), MIL-PRF-2105E and SAE J2360 satisfy the requirements of the P1 – GBM 02 service designation.

85W90 P1 - GBM 02

is an engine oil that produced by Petro 1 special base oil and hi –tech additives.

Description & Applications:

GIRBOX 85W-90 P1 – GBM 02 is an extra high performance, automotive gear lubricant formulated from select base oils and an advanced additive system specifically for limited-slip differentials. This lubricant is recommended by PETRO 1 for use in heavy duty differentials, axles, and final drives where extreme pressures and shock loading are expected. Today's truck and automotive equipment applications place higher performance demands on drive train lubricants. Higher speeds, higher torque, heavier loads, and limited-slip capability require improved formulations to maximize differential life and optimize performance. Longer service intervals place additional demands on the gear lubricant GIRBOX 85W-90 P1 – GBM 02 gear lubricant is engineered to meet these challenges. the key benefits include

REDOMA™

P1 – GBA 3

Description & Applications:

REDOMAT P1 – GBA 3 is a premium quality automatic transmission fluid for use in both passenger cars and light trucks requiring application of a DEXRON®-III (H) or MERCON® automatic transmission fluids. REDOMAT P1 – GBA 3 is a high viscosity index product that offers superior oxidation stability, excellent cycling durability, good corrosion prevention, foaming resistance, and controlled frictional properties.

REDOMAT P1 – GBA 3 is recommended for application in GM Dexron III, G FORD MERCON , ALLISON C4 ,M.B. 236.1, MAN 339 typ V1, Z1 level, VOITH 55.6335 ,ZF TE-ML 04D, 11B, 14A VOLVO 97341.

P1 – GBA 6

Description & Applications:

REDOMAT P1 – GBA 6 is a high performance, special Petro1 base oil blend formulation that meets or exceeds the stringent requirements of GM's DEXRON-VI specification and provides warranty protection for current GM vehicles. It also provides improved performance in older GM vehicles, wherever DEXRON is specified. The enhanced frictional properties that provide smooth gear shifting during low temperature operation and help prevent transmission vibration, also provide constant shifting quality over whole lifetime of the gearbox. The Improved anti-wear protection which contributes to extended transmission life along with the highest quality base oil selections also provide outstanding resistance against sludge and deposit formation. These features also contribute to a fluid that has Outstanding low temperature performance , Improved oxidation and thermal stability as well as extended life for both the transmission and the fluid.

REDOMA™

P1 – GBA DCT

Produced by Petro 1 special base oil and hi –tech additives.

Description & Applications:

REDOMAT P1 – GBA DCT is dual clutch transmission fluid developed to fulfill the highest demands of modern high tech dual clutch transmissions and is particularly suitable for transmissions were dual clutch, synchronizer, gear set and hydraulic control system operate with the same fluid.

Minimum Performance Levels :

BMW EU 83 22 2 148 578 , BMW EU 83 22 2 148 579 , VW G 052 529 , VW TL 521 82 , MB 236.21 , MB 236.25 , Porsche , Volvo 1161838 , Volvo 1161839
